High Voltage Industry Solutions

Megavar provides a unique range of Industry Solutions designed for major power users with complex industry-specific needs.

Industry Solutions are made up of three carefully chosen Service Suites. We offer great value to our Industry Solutions clients, with a bundled discount and the ability to add additional Service Suites at the same discounted rate.

Megavar brings you a unique combination of engineering expertise, industry knowledge, and implementation capability. One of the great advantages of choosing Megavar is our comprehensive offering of unbiased electrical testing, maintenance and engineering services including complete acceptance testing, commissioning, maintenance testing and engineering analysis.

From our five service locations, we offer 24/7 service coverage for our clients Australia-wide.

Healthcare and Commercial Facility Solution

Your healthcare facility provides care and services

for many, but unreliable power quality and the shortest interruption can be detrimental to lives and your bottom line. You can't afford to neglect the systems and components comprising your main electrical distribution and backup system. If you are like most facilities, you know many of your components are aging rapidly with increasing risk from continuous use.

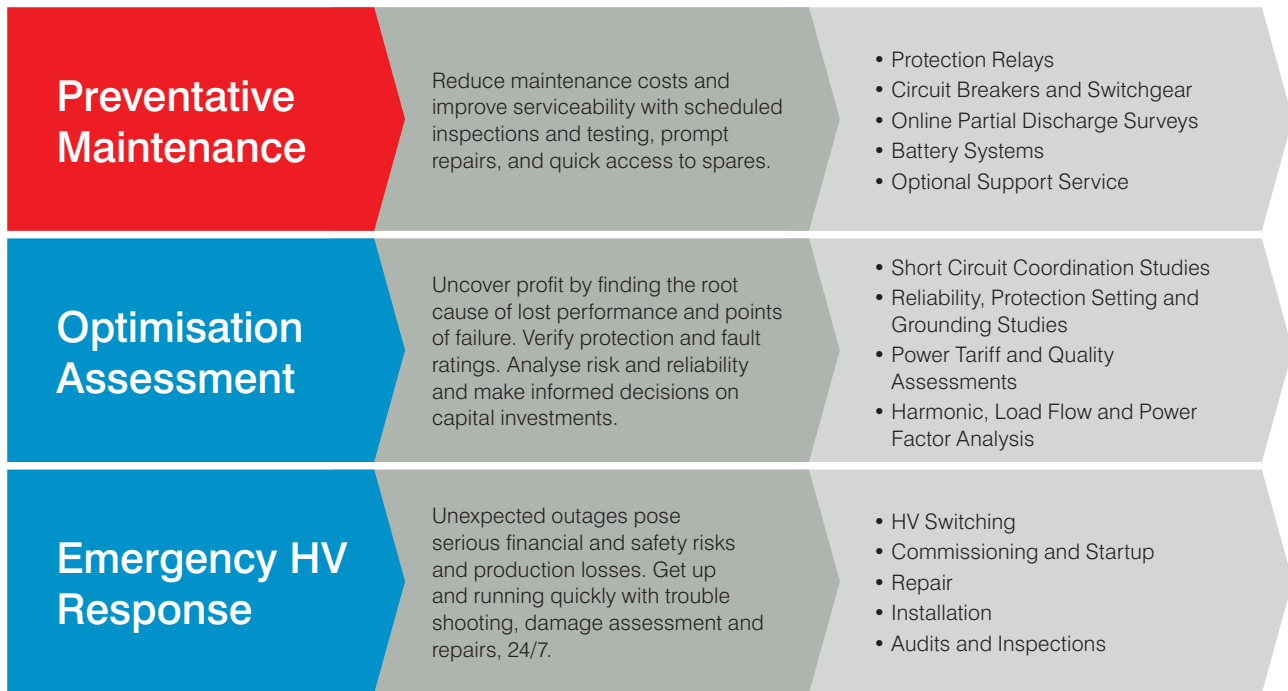

Our expert engineers and technicians have the experience, capabilities and resources to assist you in getting reliability and efficiency from your electrical assets and ensuring the highest levels of availability.

Our experts can customise solutions to support your operational goals. Our solutions for healthcare and commercial facilities:

- Increase system availability and efficiency
- Reduce overall costs
- Monitor asset reliability
- Ensure 24/7/365 power to critical systems
- Optimise distribution systems
- Upgrade and extend the life of aging assets.
