High Voltage Industry Solutions

Megavar provides a unique range of Industry Solutions designed for major power users with complex industry-specific needs.

Industry Solutions are made up of three carefully chosen Service Suites. We offer great value to our Industry Solutions clients, with a bundled discount and the ability to add additional Service Suites at the same discounted rate.

Megavar brings you a unique combination of engineering expertise, industry knowledge, and implementation capability. One of the great advantages of choosing Megavar is our comprehensive offering of unbiased electrical testing, maintenance and engineering services including complete acceptance testing, commissioning, maintenance testing and engineering analysis.

From our six service locations, we offer 24/7 service coverage for our clients Australia-wide.

Mining and Heavy Industry Solution

Your mining and industrial sites operate 24/7 and you rely on your power infrastructure and electrical assets.

Outages mean delay, product losses, and the hassle of painful start-up sequences to get your plant back online and resume production.

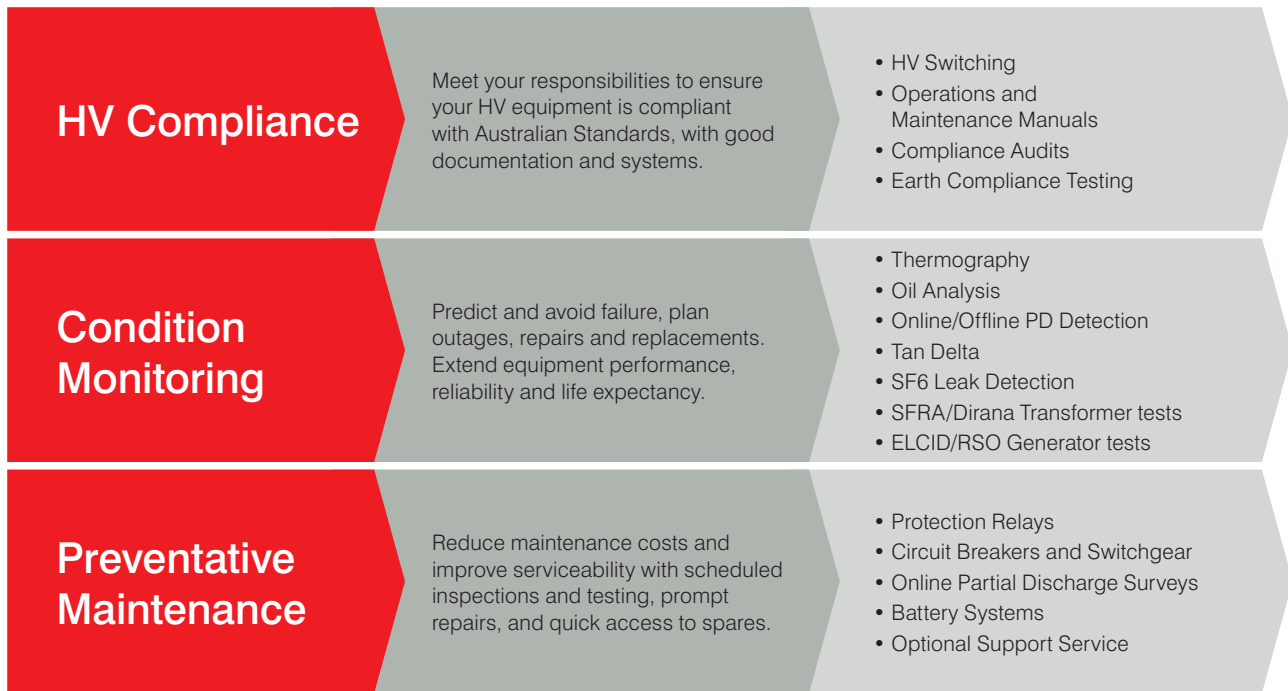

Our expert engineers and technicians have the experience, capabilities and resources to assist site operators manage condition monitoring and preventative maintenance to maximise reliability and efficiency, ensuring the highest levels of plant availability.

Our experts can customise solutions to support your operational goals. Our solutions for mining and heavy industry will:

- Increase system availability and efficiency
- Reduce overall costs
- Monitor asset reliability
- Ensure 24/7/365 power to critical systems
- Optimise distribution systems
- Upgrade and extend the life of aging assets.
